📂 Projects

Job-Queue-System-Basics ⎋   06/2025 – 07/2025
- Designed and implemented a job queue system using Node.js, Express, TypeScript, BullMQ, and Redis.
- Created a robust architecture to manage asynchronous task processing with features like job prioritization and retries.
- Integrated Redis for efficient data storage and retrieval, ensuring data integrity and performance.
- Developed comprehensive monitoring tools for tracking job statuses and system performance.

Employee Self-Service (ESS) Platform ⎋   10/2024 – 01/2025
Designed and implemented an ESS platform with diverse functionalities, including:
- Project and Task Management: Integrated Jira-style ticketing with Kanban view for tracking project tasks.
- Attendance and Holidays: Developed modules for managing attendance records and holiday schedules in a calendar format.
- Job Portals and Payrolls: Created job portal features and streamlined payroll management workflows.
- Ensured robust backend architecture to support multi-user operations and data integrity.

E-Commerce Real Estate Platform ⎋   07/2024 – 09/2024
- Developed a comprehensive e-commerce platform tailored for real estate products and subscription plans, leveraging PHP, Laravel, and MySQL.
- Optimized database structures to handle a growing catalog of real estate offerings and user interactions efficiently.
